Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Please amend claims 1, 3, 14, 17 and 18 as follows:

1. (currently amended) A method of distinguishing items for sale by a store from personal items brought into the store by a shopper comprising the steps of:
  - storing stored item identification information associated with radio frequency identification (RFID) labels on items for sale by the store in an inventory file;
  - storing costs for items for sale in a price look-up file;
  - reading RFID labels of items read by an RFID label reader as part of a purchase transaction to obtain read identification information;
  - comparing the read identification information to the stored identification information to determine whether each read RFID label is associated with an item for sale;
  - utilizing the item identification information for each read RFID label associated with an item for sale to obtain the cost for the item from the price look-up file; and
  - ignoring the read identification information of any read RFID labels determined not to be associated with an item for sale as being associated with personal items brought into the store by the shopper.
2. (previously presented) The method of claim 1 further comprising:

Appl. No. 10/668,396  
Amtd. dated April 8, 2008  
Reply to Office Action of December 31, 2007

completing the purchase transaction for items having RFID labels associated with items for sale; and

updating the inventory file to mark any items for which the purchase transaction was completed as sold.

3. (currently amended) The method of claim 2 further comprising:  
reading ~~an~~ said RFID labels to obtain item identification information for ~~an~~ items read as the shopper exits the store;

utilizing the updated inventory file to determine if the RFID labels ~~is~~ are associated ~~a~~ personal items, ~~an~~ items for sale, or ~~a~~ a sold items.

4. (previously presented) The method of claim 3, further comprising:  
displaying an alert on a security read display if it is determined the item is an item for sale.

5. (previously presented) The method of claim 1, further comprising:  
utilizing transaction software to create a shopper transaction record identified by a unique transaction number and indicating purchased items on a receipt.

6. (previously presented) The method of claim 1, further comprising:  
utilizing a card reader to accept a payment card.

7. (previously presented) The method of claim 2, further comprising:  
purging items marked as sold from the inventory file.

8-13. (cancelled)

Appl. No. 10/668,396
